Art Unit: 1742

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, the term "such as annealing or galvanizing lines" renders the claims indefinite since it is unclear if this is a limitation to the claims or merely exemplary.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 6 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by 57079123 ('123).

'123 discloses in the Constitution a method of controlling heating in a strip rolling furnace comprising:

controlling the heat radiated from some heaters within a strip rolling furnace independently from other heaters within said surface.

The Examiner notes that the reference uses the term "shielding" in the Purpose; but note that no "shields" are shown on the accompanying and that one of ordinary skill

Art Unit: 1742

would interpret the "shielding" term to mean the off condition of heaters approximate the rollers.

5. Claims 2-5 and 8 are free of the prior art, the prior art not teaching or suggesting the independent control of fuel to heaters to continually adjust heat output and the adjustment of heat output in response to the width of the strip being processed.
